

BASIC HISTORY QUESTIONNAIRE—DOGS

Basic history questionnaire—Dogs

The questionnaire that follows focuses on all aspects of your dog's behavior and health issues that could contribute to any behavioral concerns. To interpret this information in the most detailed possible light it would be helpful for you to list your dog's weight and your dog's body condition score. If you do not know your dog's body condition score, please go to the websites listed to see the scoring systems routinely used.

Dog's weight: _____ kg or _____ lb

Body condition score/BCS: _____

Separation anxiety and noise phobia/reactivity screen

The first set of these questions deals with an "actual absence"—the client actually leaves the house and the dog is either alone or totally without the client. The second set deals with "virtual absence"—the client is home, but not accessible because the door is closed or the dog is barricaded in another room. The questions are the same for each, but please answer both.

Check **NO** if the dog does not react in the listed circumstance.

Check **UNKNOWN** if you don't know.

Check **YES** if the dog reacts. Please evaluate the extent of the reaction from the list below.

IF YES:

- 100% of the time = always
- <100% of the time, but > 60% = more often than not
- 40%-60% of the time = about equally

Aggression screen

KEY: NR=No reaction; S=Snarl (noise); L=Lift lip (can see corner teeth); B=Bark (aggressive, **not** an alerting bark); G=Growl (**not** a play growl); SP=Snap (no connection with skin); BT=Bite (connects with skin, regardless of damage); WD=Withdraw or avoid; NA=Not applicable (animal has never been in that situation)

This screen can be used in three ways:

- (1) To note the presence or absence, at any time, of any of the behaviors
- (2) By the clients to keep as a log about the baseline behavior, noting how many times the behavior occurs, given the number of times it is attempted, per unit time (i.e., per week)
- (3) To keep a log about frequencies of the occurrence behaviors, given the number of times the circumstance has been encountered, at different intervals during treatment so that these numbers can be compared with those in (2)

Please note if the reaction is consistent in style, or only directed toward one person, or only present in one restricted circumstance. If using this screen only for the first use, note if the dog has been worsening in intensity or frequency in any category.

Previous Treatment Questionnaire

This questionnaire is designed to help us evaluate any role previous treatment may play in either your dog's problems or in their resolution. We would like you to answer two types of questions. The first set focuses on general, global approaches recommended. The second set, which is a fairly lengthy tick list, focuses on specific actions recommended. Please complete these tables to the best of your ability, and if our lists are not complete, or you feel that an explanation is warranted, please complete the "comment" section at the bottom. Even if you think that your dog is problem-free it would be extraordinarily helpful if you also completed this questionnaire so that we can compare dogs with problems to dogs without problems. Thanks!

This next section focuses on *patterns* of behaviors. Please indicate the appropriate answer (YES/NO/UNCERTAIN) for each of the following questions. Please feel free to add any information that you think might be helpful. You can add additional pages if needed.

	YES	NO	UNCERTAIN
2. Was there a change in the household or an event associated with the development of the behavior?	<i>If yes, please describe in detail.</i>		
3. Is there any time of day when the behavior seems more or less intense?	<i>If so, please describe in detail what is usually going on at that time of day.</i>		<i>No one is home often enough to know.</i>
4. Is there a person or another pet in the presence of whom the behavior seems more intense?	<i>If yes, who is this and what is their association to the pet?</i>		

	YES	NO	UNCERTAIN
5. Does the dog respond to its name or seem aware of its surroundings while in the midst of the behavior?			
6. Is the dog aware that you are calling him/her?	<i>If yes, how can you tell?</i>		
7. Can you convince the dog to stop the behavior by:			
a. Calling him or her			
b. Using physical restraint			
8. List the kinds of things (i.e., noises, treats, toys), if any, that will interrupt the behavior once it has started.			
9. Is there a location in which the dog prefers to perform the behavior?	<i>If yes, where?</i>		
10. For ingestion, list what types of objects are consumed. Be as specific as possible—what type of rug or sweater fabric?			
11. Does any event or behavior routinely occur immediately before the behavior begins?	<i>If so, what?</i>		
12. Does any event or behavior routinely occur immediately after the behavior ceases?	<i>If so, what?</i>		
13. Has the dog's general behavior changed in any way since the onset of the atypical behavior (i.e., the dog is more or less aloof, aggressive, withdrawn, playful, et cetera)?	<i>If so, please specify?</i>		
14. Has the dog's diet recently been changed?	<i>If so, what specifically was the change?</i>		
15. How old do you think your pet was when its ritualistic behavior began?	Age in months _____		
16. Did anyone else in the dog's family exhibit these or similar behaviors?			
17. Is there a pattern to the behavior? What are the duration, frequency, characteristics of the events themselves?	Duration: Days Weeks Months Pattern: After meals, in AM, et cetera (please specify)		
<p>Finally, familial patterns of this condition have been documented so if you can provide a pedigree for this dog, it would be extremely helpful and informative. If you are able to provide a pedigree please label the dogs in it with the following code:</p> <p>KA – Known affected KU – Known unaffected TA – Tentatively or possibly affected TU – Tentatively or possibly unaffected AO – Affected with another behavioral problem</p> <p>Any blank dogs will be assumed to have no known behavioral information.</p> <p>For this condition, affected relatives do not have to have the same form of the condition to be considered affected. In other words, some dogs may suck themselves whereas others follow fences or chase their tails. If you know what any other affected dogs do, please let us know.</p> <p><input type="checkbox"/> I am attaching a pedigree for this dog. <input type="checkbox"/> There is a pedigree available for this dog but it is not attached. <input type="checkbox"/> No pedigree is available for this dog.</p> <p>Thank you for your help in providing as much information as possible.</p>			

Questionnaire to evaluate behaviors of old dogs

This section of the history form is to be completed *only* if your dog is older (> 7 years for larger dogs and > 10 years for smaller ones) so that we can assess changes associated with aging. If your dog is not elderly or you have no complaints that could be associated with age, you do not have to complete this form. If you are uncertain, please complete the form.

Behavior screen for age associated changes:

1. Locomotory/ambulatory assessment (tick **only one**)

- a. No alterations or debilities noted
- b. Modest slowness associated with change from youth to adult
- c. Moderate slowness associated with geriatric aging
- d. Moderate slowness associated with geriatric aging plus alteration or debility in gait
- e. Moderate slowness associated with geriatric aging plus some loss of function (e.g., cannot climb stairs)
- f. Severe slowness associated with extreme loss of function, particularly on slick surfaces (may need to be carried)
- g. Severe slowness, extreme loss of function, and decreased willingness or interest in locomoting (spends most of time in bed)
- h. Paralyzed or refuses to move

2. Appetite assessment (may tick **more than one**)
